

iSYSTOC

Executive Summary

iSYSTOC is an internet solution that gives CorpOHS clients instant access to the drug testing and injury information you need, when you need it. No more phone calls about someone's work restrictions or next appointment. iSYSTOC offers pre-approved clients 24/7 secure internet view-only access to the employee information you need. Additionally, you can print a hard copy for your files. The following information is available on-line:

- **Drug Test Information** – Currently, the MRO Coordinator calls or faxes all drug test results to your company's designated contact. Hard copies of these results are also mailed. iSYSTOC will allow you to view your company's *negative* drug screen results as well as print a copy for your files. This will reduce the number of telephone calls made and faxes sent to your company to report *negative* results. Positive results will not be available on the internet and will be handled the same way as they are now.
- **Injury Treatment and Status** – Currently, Caregivers attempt to contact the company's designated "injury contact" to communicate the status of your injured worker after each visit. In addition, the CorpOHS staff at check-out prints a 'Discharge Summary' report that includes a copy for the employee and a copy for the employer. The employee is given the employer copy to take back to work. Work restrictions and future appointments are the key items communicated on this report. iSYSTOC will probably not replace these communication methods, but will provide immediate access to information if a call is missed or the employee neglects to bring back the report to the employer.
- **Injury Trend Analysis** – This report will provide companies with aggregate data on the types of injuries occurring at their company, number of limited duty days and number of lost work days incurred, as well as the costs associated with the treatment of those injuries at CorpOHS.

For information on how to get your company started with iSYSTOC, please contact your Account Manager, or call 1-877-301-3170.
